

## Small Business Training Program

Middle Ground Haiti is an inpatient and family preservation center. We strive to come alongside families to introduce lasting solutions to hunger, poverty, and generational trauma. Following a holistic approach, we currently provide three specific programs - inpatient malnutrition treatment, caregiver education and ongoing sustainability opportunities.

One of the sustainability programs we offer to the families in our programs is our **Small Business Program**. The unique training is based on a program developed by Lorika Foundation that has been adapted to reflect Haitian culture and practices. It teaches practical business skills using drawings and pictures, making it suitable for all literacy abilities.

After much success we've offered this program to business leaders in other organizations within Haiti through a train-the-trainer type model. **Organizations can send individuals to participate in a 2-day training where they receive access to the curriculum and in-depth training on how to use and adapt the program to fit their needs. Any organizations interested in attending a train-the-trainer business program or accessing the curriculum can contact us at [info@middlegroundhaiti.org](mailto:info@middlegroundhaiti.org).**
